

Microdot Protection Kit

Installation Instructions

- * **BEFORE OPENING CONTAINER, READ ALL INSTRUCTIONS FIRST.**
- ** **INSTALL MICRODOTS IN HIDDEN AREAS SO IT DOES NOT AFFECT THE COSMETIC APPEARANCE.**

PRELIMINARY CONSIDERATIONS

- Microdots are a security system so they should be stored in a secure place.
- Try to store Microdot Protection Kits at temperatures between 60 - 95° F and out of the Sun. Adhesive will freeze at 32° F or below. If product does freeze, let product thaw completely before using.
- When installing Microdots on items that have been stored outside, it is mandatory that sufficient time should be allowed to warm the item to room temperature for adhesive adherence.
- If installing Microdots outside, ensure temperature of item is above 60° F and parts are clean and dry during the installation.
- Have appropriate cleaning materials available (*paper towels, isopropyl alcohol*).
- All areas where microdots are to be installed must be free of dirt, grease, oil, and silicon based detailing materials (*armor all, etc.*) for adhesion of glue.
- Keep container of microdots sealed when not in use.
- Install in a well ventilated area.
- Allow a minimum of 1 hour dry time of Microdots. (*Product must be dry before taking item into cold temperatures*).

SURFACE PREPARATION

- Surface must be at 60° F or above.
- Areas where Microdots are to be installed must be clean and dry.
- Avoid mechanical areas that are in motion.
- Try to install Microdots in hidden areas so it does affect the cosmetic appearance.
- Once installed, installation is permanent, so ensure location is correct before applying.

INSTALLATION

- Open jar and remove foil seal.
- Because dots may settle, take applicator and stir until the dots are mixed with the glue thoroughly.
- Clean off the applicator on the sides of the jar. Now you're ready to start marking your items.
- Dab the applicator in the glue and get just a little glue and a few dots on the tip of the applicator.
- Dab the applicator on the item (place where it is hard to see) and gently apply the dots and glue.
- Repeat on all items to be marked.
- Close the lid tightly.

When done marking items, a Microdot Protection warning label can be put on items to give it an extra added security warning potential thieves that the items it marked and too risky to take.

REGISTRATION

Now it's time to register you PIN on our website (microdotprotection.com). Registering your PIN helps police identify the owners of stolen items, return them to their rightful owners and police to catch thieves.

DRYING TIMES

- Dry to the touch within one hour depending on the weather. (*Glue will be clear in appearance*).
- Fully cures within 2-3 weeks.
- Do not wash areas marked for at least one week.

CAUTION: KEEP OUT OF REACH OF CHILDREN
